COUNCIL BLUFFFS

SPECIAL TERM FOR MANAWA

County Board to Reconvene Next Thursday to Act on Vacation Petition.

COURT RULING EXPECTED BY THAT TIME

Motor Company is Anxious as Time for Preparing Resort for Regular Opening is Growing Short.

The Board of Supervisors on adjourning yesterday consented at the request of the motor company and the Council Bluffs Rowing association to meet again next Thursday to take up, if the result of the litigation now pending in the federal court permits it, the matter of the vacation of the streets and alleys in controversy at Lake Manawa.

board with this request as member of the firm of Harl & Tinley, local attorneys for the motor company and as president of the Council Bluffs Rowing association, together with other officers of the association. The request was submitted in writing and it. after asking the board to adjourn to some day this week for taking up the matter stated, recites as follows:

stated, recites as follows:

The action of the board upon this application was enjoined by the superior court, but the case has been transferred to the federal court, where it is now pending on a motion to dissoive the injunction, which was submitted to Judge McPherson last Saturday. It is believed that within a few days a decision will be reached on that motion. If the injunction shall be dissoived, it will leave this hoard free to act. It is of great public importance that this question shall be expedily determined. The public of Pottawattamis county is interested in the maintenance of the resort at Lake Manawa and the street car company can make no provision toward opening that resort until this question shall be determined. If the determination is delayed for any considerable period it will be too late to successfully prepare for such opening. It is therefore of high public interest and importance that the board be in such position that it can act if the injunction shall be dissolved. If the court shall hold the injunction is rightful then of course no action of the board can be taken. For these masons and because of the public interest and impunction is rightful then of course no action of the board can be taken. For these masons and because of the public interest and impunction is rightful then of course no action of the board can be taken. For these masons and because of the public interest and impunction is rightful then of course no action of the determination of the question it is asked that the adjournment be to some day next week.

When the attorneys for the property owners at Manawa who are fighting the vacation of the streets in question were notified of this the latest move on the part of the street railway company, they said: "It looks as if the motor company is confident that in the event of Judge McPherson ruling in its favor the county supervisors will at once accede to its request and vacate ese streets. Where do we come in in this We have certain rights which even the Board of County Supervisors cannot disregard and we certainly shall not stand idly by and permit these streets to be vacated without a protest. It may be, however, that the controversy can be amicably settled. We are waiting to hear from one of our clients in regard to the proposition we are making to the motor company as suggested by the Commercial club, but until he is heard from we cannot make any definite offer. The supreme court has decided n our favor that these streets must be kept open and we fail to see how in the face of that the county supervisors can now order them vacated, but of course the county board has not as yet signified its intention of complying with the request of the motor company,"

ENCES HIS Devotes Time to Showing Boyle's

Claim is Unreasonable.

Congressman Walter I. Smith, who commenced the closing argument yesterday for the defense in the Doyle-Burns case, undertook to demonstrate that upon the evidence of Doyle, taken as a whole, Burns was entitled to a verdict without any further evidence. This was in answer to Mr. Hughes, who in his opening argument for the plaintiff insisted that upon the evidence of Doyle's witnesses, without his own testimony, Doyle was entitled to a verdict.

Taking up Doyle's claim in the present suit, Mr. Smith made some calculations for the benefit of the jury, showing how out of all proportion, as he contended, Doyle's demand was. He showed that Burns re-

demand was. He showed that Burns received in all for the three claims involved ORMONDE'S RIGHT WINS HANDICAP in the suit 294,857 shares, out of which he gave his brother, Tom Burns, 25,000, and is sisters 125,000, retaining but 244,857 himelf. Mr. Smith explained that Doyle's demand for, 239,000 of these shares would leave Burns only 5,857 shares of stock as his share of the proceeds of the sale of these three claims, while Doyle, if he was awarded these 239,000 shares as sued for. would then have received 264,000 shares, as at the time of the sale he was given 25,000 shares. "Would, in the name of justice, such a division be fair or equitable, seeing that Burns put in 316 days prospecting and orking on these claims while Doyle only in 149 on Battle Mountain?" asked Mr.

Congressman Smith expects to occupy all of Monday with his argument.

On Monday afternoon, at the Vinton Street base bail park, the Rangers will give the Bellevue college team an opportunity to match their strength against professional players. Base ball enthusiasm was never so strong at Bellevue college as it has been this season. For six weeks and over a squad of thirty-five athletes, all anxious to get on the ball team, have been working hard at both inside and outdoor exercise. Coach Pipal has gathered together what he believes will be the strongest base ball team that has yet played under the "Purple and Gold." Monday's game will begin at 3:30.

Soon after leaving the Council Bluffs transfer Saturday noon Left Fielder O'Neill and Third Baseman Clarke of the Milwaukee base ball team were the heroes in an act that saved an old man his life. In his bewilderment the old man boarded the train bearing the base ball team to Omaha and did not discover his mistake until the train had gathered some speed. He then jumped off and was thrown onto the next track with such violence as to break an arm and leg. The train was suddenly stopped and O'Neill and Clarke hastened to the old man's assistance in time to remove him from the track over which passed half a minute later Northwestern train No. 8.

NEW YORK, April 15.—An immense outpouring of turf enthusiasts witnessed the opening of the Metropolitan racing season today at Aqueduct track and cheered the victory of Ormonde's Right, the public favorite in the Carter handicap. The winner bore the colors of Sydney Paget. Nicely ridden through the stretch by W. Davis, the Ormonde colt outfooted David C. Johnson's Roseben, the contender, and won easily by half a length. The purse was worth a bit over \$1,000. Roseben finished second and William Lakeland's Little Em third. No records garnished the opening day's contests, but the handicap was run within four-fifthe of a second of the best time ever made over the Aqueduct course. The time was 1:26%.

Trouble Over Scavenger Law. PAPILLION, Neb., April 15 .- (Special.)-A merry war between the county treasurer and county attorney of Sarpy county is being waged in regard to the scavenger law. Under the instructions of the county attorney, W. R. Patrick of South Omaha, some few weeks ago the county commissioners passed a resolution enforcing the scavenger provision of our revenue law, enforcement of which requires the county treasurer to make out a list of all delinquent lots and lands in the county and commence a suit in equity for the collection of the delinquent taxes, necessitating a great deal of extra work for the county treasurer and also entailing a heavy expense on the county. It is the contention of the county treasurer, A. R. Morrison, that the principal part of the property sought to be reached through the scavenger act is lots located in the Wilcox addition in and about South Omaha, many of which are in the Missouri river and but a few of which can be sold for anything, and that while perhaps a few private speculators may be able to clear up something by the

deal, Sarpy county will not, as it will not

realise enough from the sale of the prop-

erty in this way to pay the expenses. The

county attorney agreed with the county

Electric Lights

The up-to-date house of today is theroughly fitted with electric lights and the pure and simple reason for this is that electricity from a lighting standpoint has proven its superiority.

In the first place you step into your house of an evening and as soon as you open the door turn a switch or two and your house is flooded with light. (Beats hunting around in the dark for matches). Then again the many different and convenient kinds of incandescent lights that have been invented make it possible for the man who uses them to show off his home to a much greater advantage than by the old fashioned straight and stiff chandeller. The up-to-now house has electric light of different styles and colors peeping from every vantage-point making it seem upon first look a veritable fairyland.

We want you to call and allow us to show you the many clever and new inventions in electric lighting apparatus that we have. It will be very interesting to you and a pleasure to us.

Electric Call Bells

There are few people who have not at some time or other thought of having call bells installed in their home, but the average person also immediately connects this with a big expense and as a result the matter is postponed "for a while" and they continue to do without this almost necessity of life. Call us up and ask us about the cost of call bells. We will pleasantly surprise you. Among the new things that we are showing in this line is the clever little Tyrolean bell. This bell is suspended from a handsome bracket fastened to the wall and is in the shape of a little 4-inch silver tea gong, on the inside of which is placed the vibrating mechanism. The very thing for dining room service.

Electric Fans

When we talk about fans, we talk about something that every Omahan has, (during some of our 120 above zero nights) wished that he had. We handle the Edison Fan Motor Battery Outfits, which you can operate in any place regardless of whether your house is fitted up with electric light or not. Do not ile awake this summer suf-

Electric Pressing Irons and blectric Fortable Stoves, two articles which no home is compace without, meetrical curing Iron reaters (the ladies triend.) This heater is of an artistic design and is an ornament to any arcssing take, it is nitted with an automatic switch which turns on the current as the curing irons are inserted and off as they are withdrawn. It is finished in nickel and mounted on a marbie base, which is fitted with a cioth botton to prevent marring or scratching any surface it may be placed upon. The Electric Chafing Dish is certainly ideal. It does away with all dirt, fire, odor, danger and annoyance attendant upon the use of the ordinary dish heated by the alcohol lamp. It is always ready for use, it is only necessary to turn on the switch—the electric current does the real. The heat supply is constant and not always changing—it is not necessary to stop and no time need be lost because of refilling lamps, etc. Electric Coffee and Tea Pota are also articles that should be in every home.

Remember all these novelties are inexpensive and INVALUABLE.
